

Key Facts	Diagram/Investigations	
<ul style="list-style-type: none"> A plant is a living thing and has a life cycle Plants need water, light, space and nutrients to grow. A wild plant will grow by itself, it does not need to be cared for and if it grows somewhere unwanted it may be a weed. Evergreen trees have green leaves all year round. Their leaves are thick, waxy and narrow like needles. Deciduous trees lose their leaves in the autumn. Their leaves are generally broad, flat and have veins running through them. When plants are grown for food, this may be called a herb garden or a vegetable patch. Farmers can farm both animals and crops. There are different kinds of farm for different produce e.g. dairy, grain, citrus. Land used for crop farming is called 'arable'. 		<ul style="list-style-type: none"> Plant a bean or a seed and watch it grow. Record your observations in a diary. Go on a wild plant hunt! Create a tally chart to show how many of each plant you have found and then use the information to answer questions. Plant some garden plants, care for them and watch them grow. Go on a tree hunt - what types of trees can you see? Collect fallen leaves and identify which tree they came from using pictures to help you. Sort the leaves between deciduous and evergreen trees Label the parts of a plant showing where the leaves, flowers (blossom), petals, fruit, roots, bulb, seed, trunk, branches, and stems are.
Key Learning:	Prior Learning:	Books to support/ Enrichment Opportunities:
<p>Understand what a plant needs in order to grow well</p> <p>Know the basic parts of a plant</p> <p>Identify and name a variety of common wild and garden plants</p> <p>Identify and describe the basic structure of a variety of common flowering plants and trees</p> <p>Know about different sources of food grown by farmers</p> <p>Understand the difference between evergreen and deciduous plant</p>	<ul style="list-style-type: none"> Plants can grow. Deciduous trees lose their leaves in the autumn and winter. Plants provide food and habitats for animals 	<ul style="list-style-type: none"> Tend to gardens in outdoor area Visit to Lovania Nurseries Talks from local farmers in our community Grow seed potatoes donated from local potato farmer <div style="display: flex; justify-content: space-around;">   </div>

Subject Specific Vocabulary

Key word	Definition
bulb	A root shaped like an onion that grows into a flower or plant.
crop	The name given to vegetable, cereal or grain that is grown to sell.
deciduous	A tree that loses its leaves in the Autumn every year.
evergreen	A tree or bush which has green leaves all the year round.
flower	The part of a plant which is often brightly coloured and grows at the end of a stem.
fruit	Made by plants and usually come from flowers, we eat fruit and they are healthy.
grain	Wheat or other cereal grown to be used as food.
leaf	The parts of a tree or plant that are flat, thin and usually green.
root	The parts of a plant that grow under the ground.
seed	The small, hard part from which a new plant grows.
stem	Stick-like central part of a plant that grows above the ground from which leaves grow
